PRESS RELEASE

Adobe Digital Publishing Suite, the Adobe Creative Cloud service for publishing dynamic engaging content to tablet devices, now available through Datalogics

Chicago, IL, October 5, 2011 — Datalogics, Inc., the premier channel for Adobe document technologies, today announced the addition of Adobe® Digital Publishing Suite (DPS) to their list of Adobe offerings.

Adobe Digital Publishing Suite (DPS) is a complete solution that enables content publishers to create, manage and distribute publications to tablets and smartphones. Content is authored and organized using Adobe InDesign on the front end; and assembled into dynamic, cross-platform tablet-based content using DPS production tools provided via the Adobe Creative Cloud, announced this week at the annual Adobe MAX user conference.

Adobe DPS now joins other Adobe technologies provided through Datalogics, including Adobe Content Server, Adobe Reader Mobile SDK, Adobe PDF Library and several others.

“We’ve already seen strong demand for Adobe DPS from our existing customer base,” notes Greg Manuel, VP Marketing at Datalogics. “These companies currently utilize Adobe Content Server and Adobe Reader Mobile SDK to deliver eBook content to their users; but they’re also looking to deliver magazines and other more dynamic content. With the Adobe Digital Publishing Suite, they can continue to leverage their existing authoring tools and workflows and produce best-of-class engaging content for tablet devices. We look forward to supporting them in their endeavors.”

More information about Adobe Digital Publishing Suite, and other Adobe technologies including Adobe Content Server and Adobe Reader Mobile SDK, will be available at the Datalogics booth (Hall 8.0 Booth L970) at the Frankfurt Book Fair in Germany, October 12-16. Or visit our website at www.datalogics.com.

About Datalogics

Chicago-based Datalogics, Incorporated, an Adobe Portfolio Company, has dedicated over 40 years to delivering the highest quality software technologies and services which meet the most demanding customer needs.
